

DISCLAIMER

1. Intellectual Property and Creative Commons License (CC BY-NC 4.0)

Authors retain ownership of the copyright to their research. By publishing on this platform, authors agree to have their texts distributed under the Creative Commons Attribution-NonCommercial 4.0 International (CC BY-NC 4.0) license. This means that website users may share, copy, and redistribute the material in any medium or format, as well as adapt or remix the content, under the following conditions:

- **Attribution:** Credit must be given to the original author, a link to the license must be provided, and any changes made must be indicated.
- **Non-Commercial:** The material may not be used for commercial purposes under any circumstances.

2. Responsibility for Content

The scientific articles published on this platform represent solely the opinions, methodologies, and findings of their respective authors. The platform acts strictly as an independent digital dissemination channel (not associated with the OJS system). Therefore, it assumes no responsibility whatsoever for the truthfulness, accuracy, applicability, or validity of the data presented.

3. References to Chemical Products and Companies

Any mention of companies, trademarks, or chemical products (such as fungicides, pesticides, bioproducts, or phytosanitary treatments) is the sole responsibility of the author. Such references do not constitute an endorsement, validation, or technical recommendation by the platform. The practical application of any mentioned product is at the reader's own risk and responsibility.

4. Interaction and Use on Social Media

The platform provides features that allow users to share posts on social media. The use of these tools must strictly comply with the terms of the CC BY-NC 4.0 license; their use in posts or profiles for direct or indirect commercial purposes is prohibited. The platform disclaims any responsibility for opinions, comments, or external discussions that arise on social media as a result of the dissemination of the articles.
